Continuation of 5. does NOT place the application in condition for allowance because: contrary to applicant's assertion, Baggio does indeed teach the use of sulodexide for treating the nephropathy caused by diabetes. Applicant's attention is directed to columns 1-2 of Baggio. Baggio is drawn to the therapeutic use of glycosaminoglycans like sulodexide in the treatment of chronic renal insufficiency (diabetic nephropathy leads to chronic renal failure). Baggio further teaches the therapeuctically effective dosages vary between 20 and 500 mg a day. Cristofori and Marchi teach pharmaceutical compositions for oral use comprising sulodexide. Applicant's remarks concerning unexpected results in the range taught by Baggio.
